

ArtemiS SUITE License Management

ASM 00 (Code 5000)
 ASM 00-N (Code 5000N)
 ASM 00-N+ (Code 5000N+)

Overview

ArtemiS SUITE supports three license management variants.

The simplest form is a single user license on a dongle, which can be used with any computer the ArtemiS SUITE is installed on.

For companies with several ArtemiS SUITE users, network licenses and extended network licenses allow an optimal use and organization of ArtemiS SUITE resources in a network. All network licenses are stored centrally on a dongle. All extended network licenses are stored on a physical license server; it is not possible to store the extended network licenses on a virtual license server. Both variants of licensing allow users to select their respective required software options from a list and return them after use. This provides users with a high degree of flexibility and allows the ArtemiS SUITE to be used where it is actually needed.

As opposed to network license the extended network license also allows licenses to be used, for a limited period, on computers not connected to the network ("borrowing"). Beyond the advantages of network license, this allows users to extend the use of extended network license to applications outside the network.

Furthermore, in combination with a software maintenance (SMA) the user is entitled to overbook the extended network license for a certain duration, using the ArtemiS SUITE even more flexible.

Due to the consequence of rounding, an overbooking is not allowed, if less than three extended network licenses are available for the corresponding ArtemiS SUITE modules. The right of overbooking is calculated for each software module individually.

Single User License

The single user license allows the user to work with his purchased ArtemiS SUITE modules. The license is stored on a dongle, which must simply be connected to a computer the ArtemiS SUITE is installed on.

By simply plugging the dongle can be alternately used on multiple computers, which need not be connected to the network.

Network License (net)

The network license solution stores all available ArtemiS SUITE licenses (network pool) on a network dongle connected to a computer in the network (license server). Without requiring in-depth knowledge of the network architecture, an administrator can flexibly configure the access rights of individual users to the available network licenses.

Without requiring a local dongle, any computer in the network the ArtemiS SUITE is installed on (client computer), provided that it has been granted access to the license server by the administrator, can obtain a custom set of licenses from the available network pool of Basic Framework modules (ASM 00) and additional modules of the ArtemiS SUITE as needed. All unused licenses are available to other ArtemiS SUITE users in the network. If a desired license is currently unavail-

able, the user can view a list stating which user is currently using this license. Each time an ArtemiS SUITE instance is closed, the licenses used for it are returned to the ArtemiS SUITE network pool and are available again.

Extended Network License (net+)

Beyond the functionality of the network license the extended network license solution also allows licenses to be used on computers not connected to the network. In this case, the user books licenses for a chosen period of time ("borrowing") for his client computer, which can then be used, for example, during test drives. To launch the borrowing license on this client computer, a time dongle is required, which is included in delivery of the extended network license. After the predefined borrowing time, the license is automatically returned to the network pool.

If the network-based extended network licenses are under software maintenance (SMA), the user is entitled to use 20 % (rounded) of his extended network licenses for an additional period of time (30 days) per year (known as a "right of overbooking") to accommodate periods where there are high levels of use.

Overview License Management

Single User License	Extended Network License (net)	Extended Network License (net+)
Local license: (ArtemiS SUITE Basic Framework ASM 00 and additional modules)	Network pool: any number of licenses (ArtemiS SUITE Basic Framework ASM 00-N and additional modules)	Network pool: any number of licenses (ArtemiS SUITE Basic Framework ASM 00-N+ and additional modules)
A computer on which the ArtemiS SUITE is installed (not necessarily to be connected to the network)	Any number of client computer (connected to the network)	Any number of client computer (connected to the network); Borrowing: Any number of client computer (not connected to the network)
Local dongle plugged on any computer (not necessarily to be connected to the network)	Network dongle on a license server (connected to the network)	Network dongle on a physical license server (connected to the network)
	The administrator configures the access rights to the network licenses	The administrator configures the access rights to the extended network licenses
		Borrowing: The administrator determines, for example, the maximum borrowing time for client computers (not connected to the network)
		Borrowing: Time dongle on a client computer (not connected to the network)
		Right of overbooking for 20 % of the existing software licenses in combination with the ArtemiS SUITE software maintenance (SMA)
<ul style="list-style-type: none"> · ArtemiS SUITE Basic Framework ASM 00 (Code 5000) · ArtemiS SUITE Basic Analysis Module ASM 01 (Code 5001) · ArtemiS SUITE Basic Report Module ASM 02 (Code 5002) · ... · ArtemiS SUITE Calculation Module ASM 27 (Code 5027) · SMA-ATS0 Software Maintenance (Code 9346) · SMA-ATS1 Software Maintenance, Extension (Code 9347) 	<ul style="list-style-type: none"> · ArtemiS SUITE Basic Framework ASM 00-N (Code 5000N) · ArtemiS SUITE Basic Analysis Module ASM 01-N (Code 5001N) · ArtemiS SUITE Basic Report Module ASM 02-N (Code 5002N) · ... · ArtemiS SUITE Calculation Module ASM 27-N (Code 5027N) · SMA-ATS0-N Software Maintenance (Code 9346N) · SMA-ATS1-N Software Maintenance, Extension (Code 9347N) 	<ul style="list-style-type: none"> · ArtemiS SUITE Basic Framework ASM 00-N+ (Code 5000N+) · ArtemiS SUITE Basic Analysis Module ASM 01-N+ (Code 5001N+) · ArtemiS SUITE Basic Report Module ASM 02-N+ (Code 5002N+) · ... · ArtemiS SUITE Calculation Module ASM 27-N+ (Code 5027N+) · SMA-ATS0-N+ Software Maintenance (Code 9346N+) · SMA-ATS1-N+ Software Maintenance, Extension (Code 9347N+) · Time-Dongle (Code 9397)

It is not possible to store the extended network licenses on a virtual license server!

Support for network licenses and extended network licences

Support for network licenses - and extended network licenses of the ArtemiS SUITE is only offered within the countries, where the licenses were purchased. Any support request must be made via the administrator responsible for the cluster of licenses. Network licenses and extended network licenses used in other countries are not entitled to receive any support.

System Requirements

- Windows 10 (x64): Pro, Enterprise, Education; languages: US/Western European; or:
- Windows 8.1 (x64): Pro, Enterprise; languages: US/Western European; or:
- Windows 7 (x64): Professional, Enterprise, Ultimate; languages: US / Western European, Service Pack 1
- Min: Core2Duo, 2 GHz, recommended: Intel i7 Quad.; 4 GB RAM, recommended: 8 GB
- DirectX 9.0c capable graphics card with 256 MB, recommended: 1 GB
- .NET Framework 4.5.1; DirectX 9.0c; HASP dongle driver
- SXGA display resolution: 1280x1024, recommended: 1980x1080 / 1980x1200

In order to install software and drivers from HEAD acoustics, administrator rights are required. To operate the software, only standard user rights are needed.
